-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claim 44 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 44 recites the limitation "said tamper plate" in line 2. There is insufficient antecedent basis for this limitation in the claim.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 10, 42-44 are rejected under 35 U.S.C. 102(b) as being anticipated by Holce.

Regarding claim 10, Holce discloses a magnetic contact apparatus for use with an alarm system comprising a logic circuit to indicate an alarm condition if a magnetic actuator 22 is moved outside an actuation zone or if a magnetic field from a source other than the magnetic actuator is brought into the actuation zone after the magnetic actuator is brought into the actuation zone.

Regarding claim 42, Holce discloses an intrusion sensing unit with a logic circuit 20, 22, an alarm, means for detecting tampering with the intrusion sensing unit.

Regarding claim 43, Holce discloses a tamper plate 101, a magnet, a tamper switch 40 and a tamper circuit (fig . 2-8).

Art Unit: 2636

Regarding claim 44, Holce discloses a core section and an outer section (figures 3-5).

4. Claims 1, 4-9, 19-41, 45-55 are allowed.

5. Claims 11-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Answers to Remarks

6. Applicant's arguments filed on April 19, 2004 have been fully considered.

Applicant's arguments with respect to claims 42-44 have been considered but are moot in view of the new ground(s) of rejection.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., logic circuit is a series of yes/no decisions, the electrical path achieved through a precise series on activated and inactivated reed switches) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims.

7. **THIS ACTION IS MADE NON-FINAL.**
